Northwest Current Incident Details

Incidents not Previously Reported: 0

Incidents Previously Reported: 0

Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD) (link)

None currently reported.

Lists fires (of any size) that singly utilize Monitor, Confine or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

Northwest Fire Potential Summary

Warm, sunny conditions will begin Saturday morning. This will be the beginning of another warming and drying trend with higher temperatures into the end of the week. Significant fire potential will continue to increase with increasing chances of wind driven fires in cured rangeland grasses. Moderate fire behavior can be expected in bitter brush and stressed timber areas.
